Express Profile by Trumpet Inc.

Trumpet, Inc., a global leader in developing software products and services to benefit Worldox document management users, has announced the availability of Express Profile™, an extremely efficient file reservation application designed exclusively for Worldox users.

By using Express Profile, firms can delegate scanning to anyone who can operate a scanner, yet still provide accuracy in filing.

Here's how it works: Express Profile enables knowledge workers to create filing reservations for paper files. From there, a scanning operator scans the documents using only the file reservation ID as the file name. The scanning operator requires no knowledge of how Worldox operates nor details about how the documents should be filed. The workflow is easy, fast, foolproof!
